No. of Beneficiaries : I MBA – 47 Students

Date: 26.09.2024

Title: Industrial Visit to Agni Steels Private Limited

Report:

Recently, a group of MBA students visited Angi Steel Private Limited to gain insights into the steel production process. The students were given an overview of the company's daily operations, which included detailed explanations of the steel manufacturing process. The visit provided valuable exposure to the techniques used in heating and cooling steel, essential steps that impact the strength and quality of the final product.

The company also demonstrated these processes through a series of videos, giving the students a clear understanding of how raw materials are transformed into finished steel products. The visit allowed the students to connect theoretical knowledge from their coursework to real-world industrial practices, further enriching their learning experience.

Outcome of the Industrial Visit:

- Students gained practical knowledge about the entire steel production process, from raw material handling to finished product creation.
- The experience allowed students to connect classroom theory with real-world industrial practices, enhancing their understanding of manufacturing and production management.
- The visit enabled students to understand the complexities of industrial production, which will aid in strategic decision-making and leadership roles in the future.
